SUBJECT: FSD for Liquid Waste Disposal (VA-56)

DATE: APR 23 1982

FROM: Eric W. Johnosn *E. Johnson*
Superfund/RCRA Compliance Section

TO: File

Background:

Liquid Waste Disposal, Inc. was a small company that incinerated industrial waste. They were under a January 13, 1981 court order to clean up their property, and this activity was monitored by the Piedmont Regional Office of the SWCB. Soil samples were taken for heavy metals and PCB's, but the results were negative. Some soil was excavated and removed to a landfill. Drums at the site were removed, and the incinerator was dismantled. The clean up was completed on September 22, 1981.

Recommendation:

It is recommended that a Final Strategy Determination for "No Action Needed" be issued for this site.

Concurrence:
